All of our buses have space for one wheelchair user but we cannot guarantee the driver's discretion. There may be this facility. We will carry most

wheelchairs and electric wheelchairs up

to 700mm wide, 1200mm long (including footplate) and a total weight of 300kg

(including the occupant) If the wheelchair space is already occupied by a baby buggy or a sleeping dog then the driver will ask for the space to be vacated. However, we cannot force customers to move or leave the bus. We will always try our best to get everybody where they need to go.

Mobility scooters are not normally carried as they are outdoor vehicles intended for use as an alternative to public transport for short trips. They are generally less manoeuvrable and some cannot be used as a seat on a vehicle because of their instability and difficulty in providing appropriate restraint systems for both the scooter and user.

Real Time Information **Screens**

Many bus stops across Cambridgeshire have Real Time Information (RTI) displays provided by the County Council and all our Whippets are microchipped so they can be tracked.

The times are displayed in two different ways If the RTI display shows "23min" (as in the photograph) then this means the bus is predicted to arrive in 23 minutes. The bus ha ted using GPS tracking and it is o time. The time shown will reduce as the bus gets closer. If the time shown is just the scheduled time, e.g "14:08" then the bus has not been detected. This does not necessari mean the bus won't arrive at 14:08 - it might be because the bus has not entered service yet. Or it could be a defective piece of equipment on board the bus or an error in the nformation which controls the system. Unde this scenario, the journey will disappear from the RTI display at 14:09 as the system assumes the bus is running on time.
